Department of Energy Office of Science:

In 2015, educational organizations in [Indiana](#) received research awards from the DOE office of Science worth \$25,598,019.

Companies Created from Research in Indiana

[Therametric Technologies](#), founded in 1996, develops devices that use light waves to spot weaknesses in tooth enamel. Dr. George Stookey and Indiana University colleagues started the company based on their promising research to identify dental cavities earlier and to reverse cavity growth.

[ImmuneWorks](#), founded in 2006, conducts research on a means to suppress lung disease by conditioning the body with small doses of a protein before lung transplantation. Based in the Indiana University Emerging Technologies Center, ImmuneWorks is also working on effective treatments for serious lung diseases like idiopathic pulmonary fibrosis (IPF).

[FAST Diagnostics](#) is a medical technology company that has a patent-pending device and technology that will provide rapid and accurate measurements of kidney function. Founded in 2006, the company is led by founder, medical director, and professor at the Indiana University School of Medicine Dr. Bruce Molitoris.
