

Champion of Science Award

The Science Coalition's Champion of Science Award recognizes members of Congress whose actions and votes consistently reflect their belief that basic scientific research, conducted at universities and national labs across the country, is essential to the nation's ability to address pressing issues in health, security, energy and the environment, and additionally, that a strong federally supported basic research enterprise drives innovation that fuels the U.S. economy. A distinguished group of nearly 80 current and former members of Congress have received this award since 1999.

Champions of Science in the 115th Congress
